

Logistics Solutions Tailored to Your Needs

Experience, infrastructure, and control in all logistics processes.

Who We Are

A logistics chain that operates as a single system.

Since 1997, we have built a solid track record in the logistics sector, based on experience, evolution, and knowledge of international trade.

At Magnum Logistics, we support companies across different industries in planning and managing their operations, integrating infrastructure, technology, and specialized expertise.

Our business units operate in an integrated manner to provide visibility, control, and decision-making support, enabling efficient, traceable logistics processes aligned with each operation's requirements.

Business Units

Free Trade Zone

Logistics services within Free Trade Zones as an industrial and service user.

Customs Agency

Advisory and customs brokerage services, including customs transit (DTA) for imports and exports.

Ground Logistics

Land transportation provider with door-to-door services and authorization to perform customs transit operations (DTA and OTM).

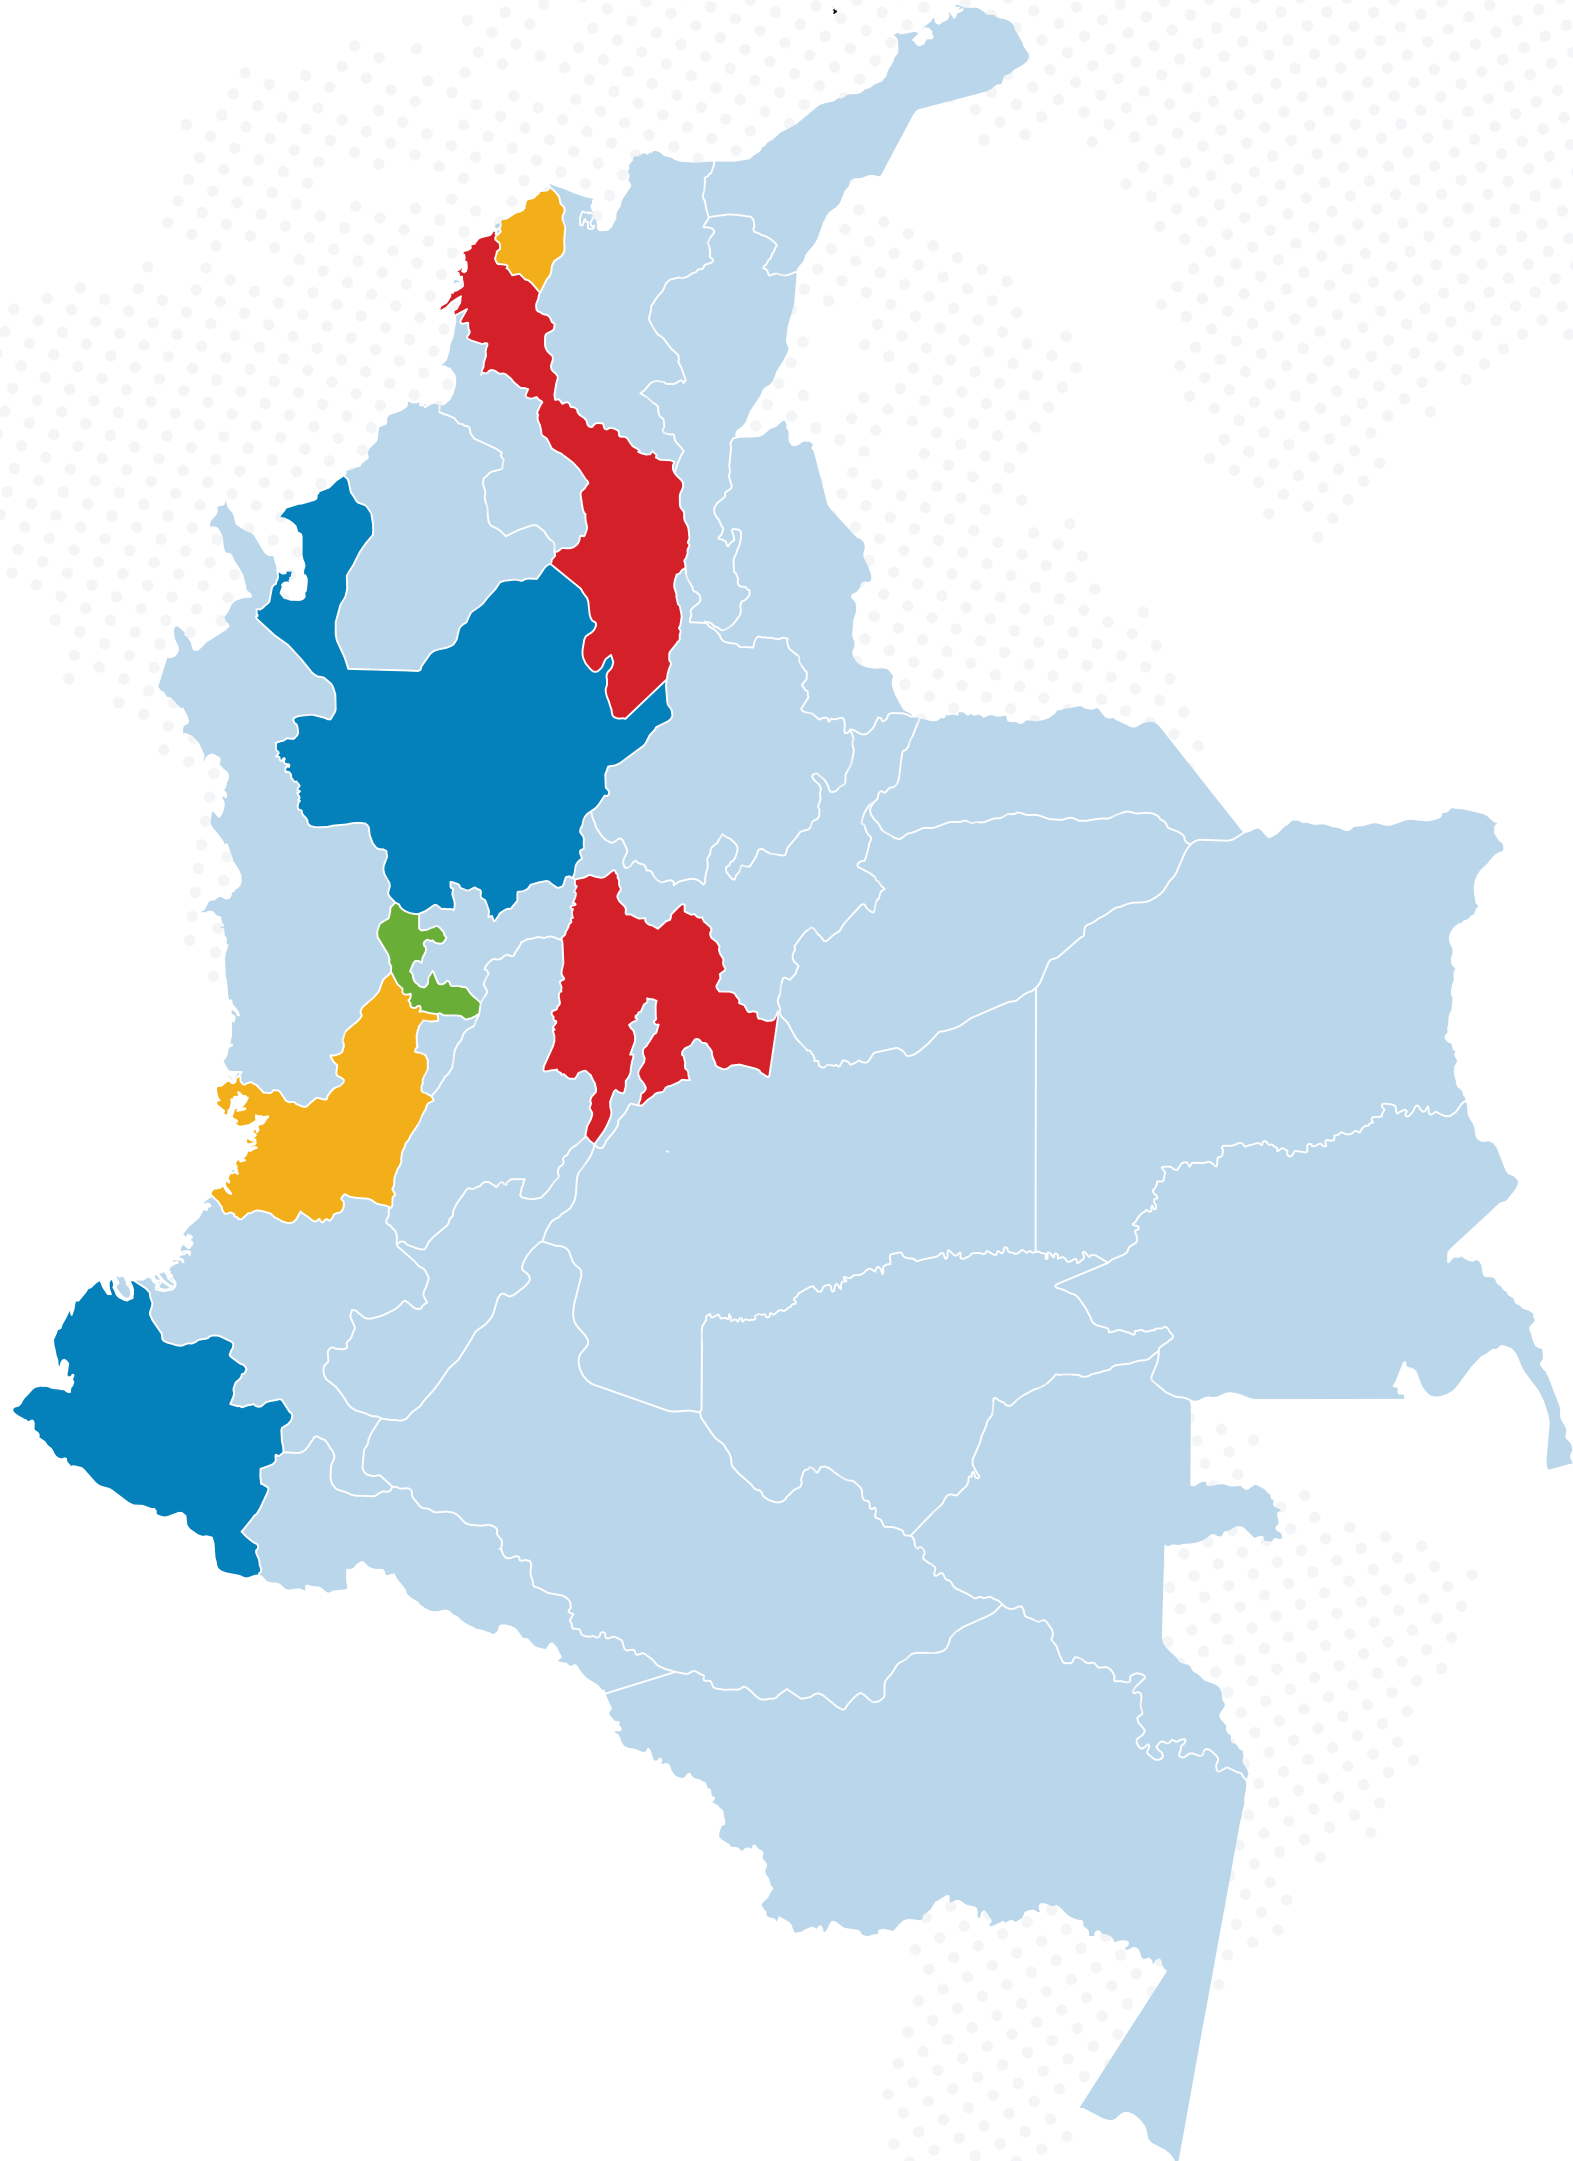

Freight Forwarder

Advisory, handling, and management services for international cargo transportation.

Logit CO

End-to-end supervision of each stage of the logistics process, ensuring updated and accessible information. For complex operations, a simple and comprehensive solution.

Freight Forwarder

We manage air and ocean freight operations, adapting to the characteristics of each shipment and client requirements.

From in-house consolidations to special and project cargo, our role focuses on planning, coordination, and monitoring of international operations.

Global air and ocean freight coverage

In-house consolidation services for greater efficiency

Specialized handling of complex cargo and projects

Full visibility and traceability at all stages

Customs Agency

We turn customs processes into a clear and predictable path.

Our technical team, supported by experience and technology, supports import and export operations under compliance and document control standards.

Imports, exports, and special regimes

Real-time remote inspections

Procedures with ICA, Invima, and government entities

Specialized technical and document support

Free Trade

With more than 41,000 m² in strategic Free Trade Zones, we operate logistics, industrial, and value-added processes, facilitating inventory management and operations under the free zone regime.

We act as an operational extension of our clients, offering precision and flexibility.

Picking, packing, kitting, and cross-docking

Assembly, integration, and remanufacturing

Inventory control and dispatch

Labeling, repacking, and price adjustments

Ground Logistics

We are authorized to operate under OTM and DTA schemes, allowing us to manage customs transit in compliance with regulations and high operational standards.

We operate with full traceability and continuous control, ensuring each movement is executed in a clear and organized manner.

Domestic cargo transportation

Customs transit (DTA) and OTM operations

Containerized, hazardous, and oversized cargo

In-house consolidation of loose cargo from ports

Project cargo

Transformers

- ✓ POL: Guangzhou
- ✓ POD: Barranquilla
- ✓ Weight: 1210 TON
- ✓ Quantity: 11

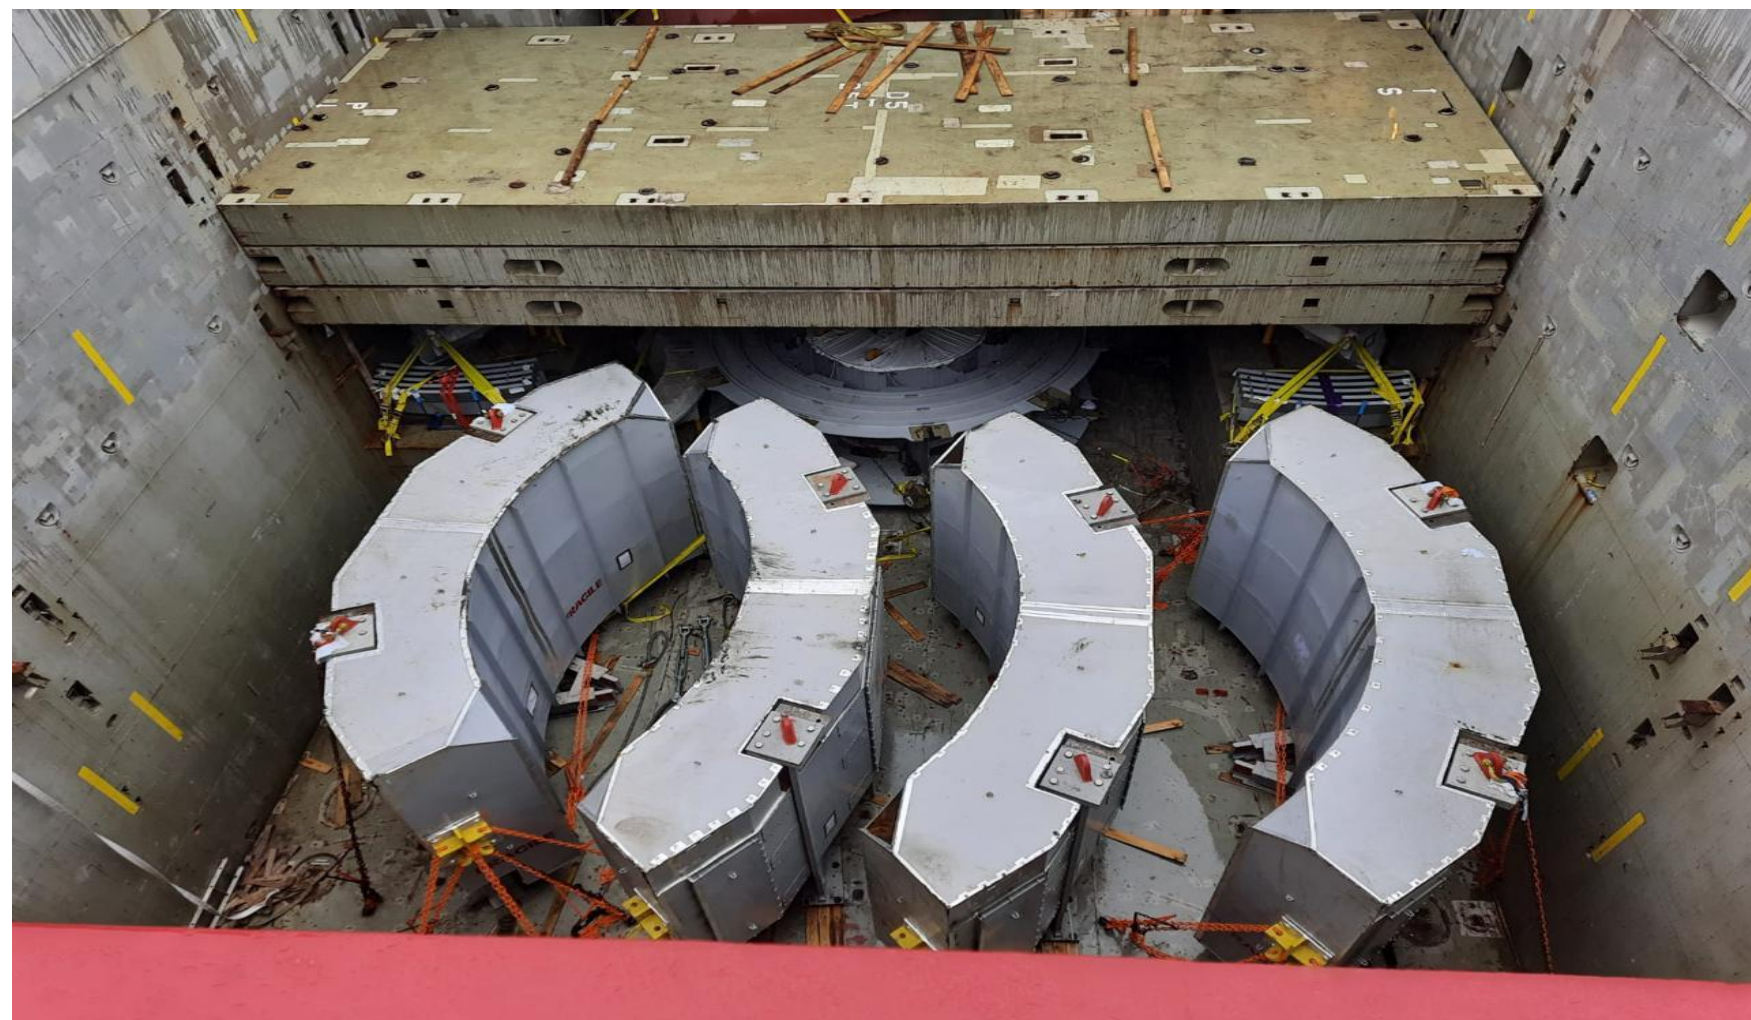

Hidroituango's Stator

- ✓ POL: Santos, Brazil
- ✓ POD: Cartagena
