# REPORT OF FINDINGS

NEW METAL WORKS PLANT PROJECT- CHEDA LINKS GROUP LTD

PREPARED BY: EVANS GITONGA  
FR: OFFSHORE GLOBAL LOGISTICS LTD

# INTRODUCTION

This is a report of findings associated with the logistics processes involved in the setting up of a new metal works plant for our client Cheda Links group Ltd- Kenya

The plant is located in Thika Town, Kiambu County, Kenya

This report covers the challenges and learnings involved in the movement of the cargo.

# CUSTOMS CLEARANCE CHALLENGES

- One of the challenges we faced is the justification of the tariff 8463.30.00 for the nail making machine. This tariff is basically exempted from any taxation. The machine was shipped in different batches thereby making it a challenge to justify the tariff considering its not applicable for a part of the machine.
- However, this was resolved via clearance under bond which we later cancelled after all the shipments had been cleared and customs visited the site during set up

# NAIL MAKING MACHINE

Offloading of the machine by technicians

# ROAD TRANSPORTATION CHALLENGES

- Obtaining the various oversize cargo licenses from several governmental organizations was a big challenge, there was a lot of bureaucracy and document duplication.

# ADDITIONAL PICTURES- RELATED PROJECT(S)

# CRANE SERVICES

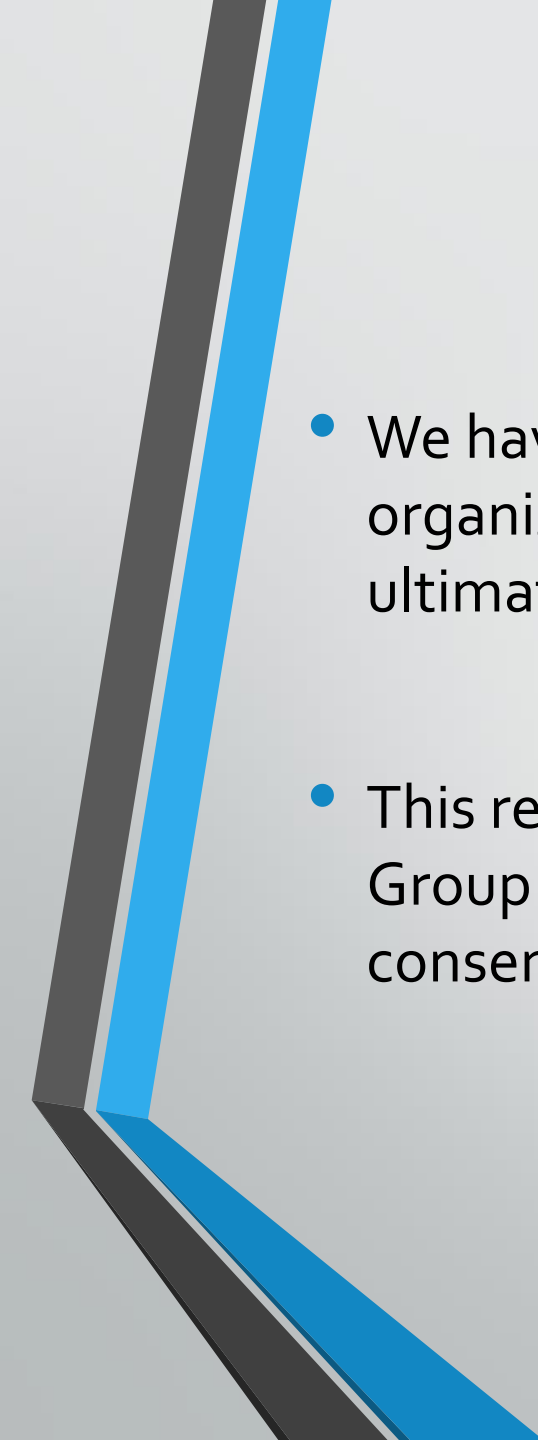

- We faced a brief challenge in getting crane services from our subcontractor whose cranes were not meeting the set out safety standards by our client. We managed to get an alternative service provider. This however led to a day's delay in offloading of the trucks.

# CONCLUSION

- In Conclusion, the logistics industry is never short of challenges, however to stand out as a service provider, you need to always be prepared to offer alternative solutions to the client with minimal interference with their set out timelines.
- We at offshore Global Logistics are always committed in providing unraveled supply chain solutions to our customers. Our service is second to none.

- 
- We have done several projects for governments, non-governmental organizations and corporate entities. Our business with our clients is done with ultimate confidentiality.
  - This report of findings was prepared with the full consent of Ms. Cheda Links Group Limited and is not to be used in any way without the full authority and consent of Offshore Global Logistics management.
