

PREMIER
Logistics Simplified

WELCOME TO PREMIER

A business is more than just a means to earn. It's the path towards one's ambition, the reward of years of perseverance, and the hallmark of success. It's a commitment to one's family, employees and country of a successful future.

At Premier, we go the extra mile to simplify your journey in accomplishing your dreams. And we have been successfully doing it for 33 years.

SERVICES

Our competence with project logistics is well proven. With over three decades in the industry, we provide efficient, cost-effective, innovative and tailor-made solutions; simplifying logistics for our clientele in India and across the globe.

Integrated Project Logistics

We offer single window services covering all aspects of integrated project logistics. We also offer 3PL & SCM services to facilitate the various requirements of our customers.

Project Forwarding

We offer the best in container, conventional shipping and special charters by sea/air. We also provide tailor-made freight options by using multimodal means to give you the most cost-effective solutions.

Heavy and ODC Cargo

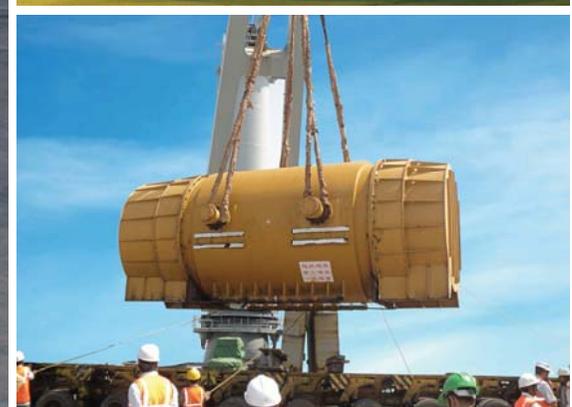

No matter when or where or how heavy the load, our special team of professionals and technicians pre-plan the shipping and transportation process to ensure safe delivery. We have the resources to ship and deliver single units up to 1800 metric tons in weight.

General and Break Bulk Cargo

We offer general and break-bulk cargo shipping and transportation for projects anywhere on the globe. Our expertise ensures seamless movement of the cargo from vendor to project site, both for import and export consignments.

Containerised Cargo

We also provide logistics services for all types of container movement on a door-to-door basis across India and the globe. Be it 20 ft, 40 ft, HC or Flat Rack, we will optimise the stowage of your cargo by utilising the most suitable containers.

Feasibility Study and Route Surveys

To eliminate every possible roadblock in your consignment's transportation, our special team conducts studies and creates a feasibility report. This in turn helps us pre-plan the process, including preparation of roads if not present, reinforcements to weak bridges, and extra pullers/pushers for difficult terrain.

Tracking

We offer real-time progress reports of your shipments on a daily basis. We are now in the process of upgrading to GPRS & GPS services to provide you with the ultimate tracking facility.

Customs Clearance

We also provide inbound/outbound customs clearance, pre-shipment documentation input, insurance coverage and surveys to ensure smooth movement of your consignments.

Port Handling

Our services in port handling include all local movements of import and export cargo within the port premises. We help you receive, shift, stuff, de-stuff, load, unload, store & dispatch all your shipments with complete safety and care.

Warehousing

We own several 5,000 to 10,000 sq. ft warehouses in all the major metro cities. Additional facilities up to 50,000 sq. ft can be arranged if required. We also provide independent and shared facilities, inventory control, packing, sorting, re-packing and labelling, along with the best security for your goods throughout the year.
