

NETWORKING PLATFORM FOR THE WORLD'S TOP PROJECT CARGO SPECIALISTS

JOIN AND MEET OUR FAMILY!

OUR NEXT MEETING:

PRAGUE

7TH ANNUAL SUMMIT

19-21 NOVEMBER 2017

For only £1050 per year, we provide heavy lift and project cargo specialists' access to a trusted network in 100+ countries.

NEW FOR 2017!

Thorough training is essential in today's industry and we will shortly be launching a bespoke eLearning Platform with a 5 module online training programme.

BESPOKE HEAVY LIFT ONLINE TRAINING

We understand that one of the main challenges in our industry is the lack of training and staff development in the heavy lift and project cargo sector, especially with new and young staff members. Practical 'on the job' experience needs to be paired with theoretical knowledge, as this leads to a deeper understanding. However, specialist training courses and workshops are often expensive and involve travel and time away from the office.

Our custom built eLearning Platform incorporates a comprehensive 5 module online training program.

Besides the benefits of not having to travel to a training centre and sit in a classroom for long periods, there are additional advantages to eLearning such as being able to stop the training at your convenience and start again when you are ready.

We have taken this a step further by breaking the training into 54 x 10 minute sessions which are long enough to get an important point across but short enough not to disrupt your day.

When the training is completed the user will understand the practical, operational and engineering aspects of heavy transport, heavy lift and project cargo and will be able to ask pertinent questions at the relevant time and understand industry terminology.

The training includes 9 multiple choice tests to ensure that each subject has been fully understood before continuing to the next topic. The personal profile page contains a progress bar and a list of achievements so you can track your advancement through the course. Upon completion you will receive a Certificate via courier.

Future plans include more advanced modules.

Project Cargo Network is an ISO 9001 (Quality Management) and ISO 14001 (Environmental Management) certified organisation established in August 2010 to provide heavy lift and project cargo specialists access to a trusted, worldwide network of agents who can handle their specialist shipments, whilst working professionally and safely under a strict Code of Conduct.

Project Cargo Network works hard to develop new membership benefits and has invested in both the bespoke training and the eLearning platform so that it can be provided at a heavily reduced rate.
